

This is $n-2$ (not even $n-1$). I shall rewrite at least twice more before I shall be satisfied with the text. But the revisions will mainly be in style; and the scientific content, arrangement, and emphasis will be essentially invariant. So you can concentrate on science. I hope I have said things correctly; but any suggestions, corrections & dissatisfactions will be welcome.

I am also enclosing a copy of my reactions: they probably deviate from yours: no two reactions are the same.

Please phone in your corrections. I hope to send the paper to the R.S. by the end of next week.

Thanks for your
- collaboration.

Chandross
